PRODUCT BENEFITS

360° access to breast
Increased access to lesions in upper/outer quadrant
Compatible with any stereotactic add-on system
Drop sections provide closer access for image receptor
Decubitus positioning provides greater patient comfort
Enhances ergonomic posture as technicians work upright in drop sections
Back support allows the patient to take deep breaths while keeping the chest wall in contact with the image receptor
Minimizes risks associated with fainting during an upright procedure
Bariatric capable

OPTIONAL FEATURES

Foot Controller
