

The Ultimate Sonographer Chair for All Procedures

HÅG Capisco 8106 is delivered with a seat and T-shaped back section in a Pauly pattern with Ash colored vinyl. *Black vinyl available.*

Saddle seat can be adjusted 19"-26" (200mm gas lift) to ergonomically accommodate both low and high working positions. *SHORT 16.25"-21.5" and TALL 22.5"-32" adjustment columns available.*

Easy to use levers control seat height, seat depth, back height and tilt resistance providing optimum positioning for all procedures.

Simple to adjust, the back is designed to support sitting in four directions and provides maximum support and flexibility.

Featuring dynamic ergonomics the HÅG Chair promotes natural upright positioning.

T-shaped back works to support sonographer elbows, arms and wrists during cardiac, vascular, general and women's sonography.

Optional removable foot base.
